Portfolio/Webpage Design and Creation

What

A webpage containing portfolio materials produced for a portfolio course at UIC. I edited bootstrap code from W3.CSS to create an HTML file hosted by Github. I independently learned and utilized HTML and CSS coding to create the webpage, demonstrating adaptability and a desire to take on unfamiliar, challenging projects.

Work Performed

- Designed color scheme, layout, and branding on professional webpage.
- Wrote and edited sections of bootstrap code to create a functional webpage.

Why

- Adaptability
- Willingness to learn
- Design aptitude
- HTML & CSS
